V.

THE GREAT TABLE.

OF 2:30 TROTTERS AND 2:25 PACERS UNDER THEIR SIRE.

This table includes all sires of standard performers and is intended to show the blood-elements and best records of sires and performers, the date of the performance, and the number of heats in 2:30 or better of trotters, and 2:25 or better of pacers.

After each sire is given the total number of 2:30 trotters and 2:25 pacers to his credit at the close of 1903, together with the total number of performers produced by his sons and daughters.

An asterisk (*) preceding the name of an animal indicates that the record was made in a contest against time.

Two asterisks (**) preceding the name of an animal indicate that the record was made with pacemaker in front, with dirt shield.

The Roman numerals inclosed in parenthesis, as "(IV.)," indicate the volume of the AMERICAN TROTTING REGISTER from which the pedigree is taken.

Table of Great Brood-Mares.

[This table includes (1) mares that have produced two or more trotters with records of 2:30 or better, or two or more pacers with records of 2:25 or better, or one trotter with record of 2:30 or better, and one pacer with record of 2:25 or better; (2) mares that have produced one 2:30 trotter, or one 2:25 pacer, and another son or daughter that has sired or produced a 2:30 trotter or a 2:25 pacer.]

The name is given of all Great Brood Mares previously included in this table, the name of their sire when known, and the total number of their standard performers, as well as the total number produced by their sons and daughters.

The Roman numerals inclosed in parenthesis, as "(X.," indicate the volume of the AMERICAN TROTTING REGISTER, from which the pedigree is taken.

Index to Trotting and Pacing Horses for 1903.

[Pages in parenthesis indicate a winning heat or a dead heat. Small figures indicate the number of times on the page. Italics indicate a pacer. When an "r" precedes a record in parenthesis, it indicates that the record has been rejected by the American Trotting Register Association.]

Some performers were reported and printed in the summaries as trotters that subsequent information showed were pacers. The gait of such animals is correctly shown in the index.
